Tansiv Jubayer

Data Analyst | Data Engineer

Dhaka, Bangladesh +880-1837-011572 jtansiv@gmail.com

github.com/Tansiv linkedin.com/in/tansiv-jubayer Portfolio

Professional Summary

Data Analyst and Machine Learning Engineer with experience developing end-to-end data pipelines, predictive models, and analytical workflows using Python, SQL, TensorFlow, PyTorch, and Deshboards. Contributed to four peer-reviewed IEEE and Springer publications involving time-series forecasting, computer vision, and machine learning benchmarking. Skilled in feature engineering, ETL workflows, statistical analysis, and transforming raw datasets into actionable insights.

Education

BSc in Computer Science & Engineering
East West University, Dhaka 2025
Specialization: Data Science & ML
CGPA: 2.66 / 4.00

Higher Secondary Certificate (Science)
Ideal College, Dhaka 2020
GPA: 4.50 / 5.00

Secondary School Certificate (Science)
Motijheel Model School & College 2018
GPA: 4.50 / 5.00

Technical Skills

Programming:
Python, SQL, HTML/CSS/JavaScript

Machine Learning:
TensorFlow, PyTorch, Scikit-learn, CNN, LSTM, XGBoost, ResNet50, Swin Transformer

Data Engineering:
Pandas, NumPy, ETL Pipelines, Feature Engineering

Visualization & BI:
Power BI, Excel, Matplotlib, Seaborn

Tools:
Git, GitHub, Jupyter Notebook, Google Colab

Core Competencies

Analytical Thinking ▪ Problem Solving ▪ Technical Writing ▪ Research Design ▪ Collaboration ▪ Stakeholder Communication

Languages

Bengali (Native)
English (Professional Working Proficiency)

Research Projects

Energy Demand Forecasting Publication Link
IEEE COMPAS 2025 — Bachelor's Thesis

- Developed a time-series forecasting pipeline using LSTM and XGBoost on 10,000+ energy records.
- Reduced forecasting error by 15% through feature engineering and ETL optimization.

Crop Leaf Disease Detection Publication Link
Springer ICIDA 2024

- Built a ResNet50-based image classification pipeline using 5,000+ agricultural images.
- Achieved 92% accuracy using transfer learning and augmentation.

Rare Medicinal Plant Classification Publication Link
IEEE QPAIN 2025

- Implemented a Swin Transformer model for high-resolution plant classification.
- Improved precision by 10–12% compared to CNN baselines.

Earthquake Magnitude Prediction Publication Link
Springer ICIDA 2024

- Benchmarked six machine learning models using RMSE and MAE metrics.
- Applied structured feature engineering for seismic prediction.

Research Highlights

- Co-authored 4 peer-reviewed publications in IEEE and Springer conferences.
- Presented research involving forecasting, computer vision, and ML benchmarking.
- Managed preprocessing, experimentation, evaluation, and manuscript preparation workflows.
- Improved reporting workflows through process standardization.
